Title: Lending Limits.

OMB Control No.: 1557-0221.

Affected Public: Businesses or other for-profit.

Type of Review: Extension of a currently approved collection.

Abstract: 12 CFR 32.7(a) provides that, in addition to the amount that a national bank or savings association may lend to one borrower under 12 CFR 32.3, an eligible national bank or savings association may make:

(1) Residential real estate loans or extensions of credit to one borrower in the lesser of the following two amounts: 10 percent of its capital and surplus; or the percent of its capital and surplus, in excess of 15 percent, that a state bank or savings association is permitted to lend under the state lending limit that is available for residential real estate loans or unsecured loans in the state where the main office of the national bank or savings association is located;

(2) Small business loans or extensions of credit to one borrower in the lesser of the following two amounts: 10 percent of its capital and surplus; or the percent of its capital and surplus, in excess of 15 percent, that a state bank is permitted to lend under the state lending limit that is available for small business loans or unsecured loans in the state where the main office of the national bank or home office of the savings association is located; and

(3) Small farm loans or extensions of credit to one borrower in the lesser of the following two amounts: 10 percent of its capital and surplus; or the percent of its capital and surplus, in excess of 15 percent, that a state bank or savings association is permitted to lend under the state lending limit that is available for small farm loans or unsecured loans in the state where the main office of the national bank or savings association is located.

An eligible national bank or savings association must submit an application to, and receive approval from, its supervisory office before using the supplemental lending limits in § 32.7(a). The

supervisory office may approve a completed application if it finds that approval is consistent with safety and soundness. Section 32.7(b) provides that the application must include:

(1) Certification that the national bank or savings association is an eligible bank or eligible savings association;

(2) Citations to relevant state laws or regulations;

(3) A copy of a written resolution by a majority of the bank's or savings association's board of directors approving the use of the limits and confirming the terms and conditions for use of this lending authority; and

(4) A description of how the board will exercise its continuing responsibility to oversee the use of this lending authority.

Twelve CFR 32.9(b) provides national banks and savings associations with three alternative methods for calculating the credit exposure of non-credit derivative transactions (the Internal Model Method, the Conversion Factor Matrix Method, and the Current Exposure Method) and two alternative methods for calculating such exposure for securities financing transactions. The OCC provided these alternative methods to reduce the practical burden of such calculations, particularly for small and mid-size banks and savings associations.

Under 12 CFR 32.9(b)(1)(i)(C)(I), the use of a model (other than the model approved for purposes of the Advanced Measurement Approach in the capital rules) must be approved in advance and in writing by the OCC specifically for part 32 purposes. If a national bank or federal savings association proposes to use an internal model that has been approved by the OCC for purposes of the Advanced Measurement Approach, the institution must provide prior written notification to the OCC prior to use of the model for lending limits purposes. OCC approval also

is required before any substantive revisions are made to a model that is used for lending limits purposes.

Estimated Number of Respondents: 295.

Estimated Annual Burden: 1,958 hours.

All comments will be considered in formulating the subsequent submission and become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the information collection burden;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: April 30, 2019.
